

When diagnosing hypertension, accurate blood pressure readings are non-negotiable.

High blood pressure is the #1 risk factor for heart attack, stroke and kidney disease.^{1,2} And a new, lower AHA definition of hypertension points to the need to assess, diagnose and treat the condition with the best tools possible.

The Welch Allyn Connex[®] Spot Monitor provides:

- More accurate diagnosis with blood pressure averaging³
- More efficient workflows with averaged readings sent to the EMR so you record the more accurate measurement.
- More comfortable blood pressures done quickly with blood pressure measured on inflation

July 1 - September 14, 2018

Earn rewards when you purchase a Connex Spot Monitor featuring blood pressure averaging.

UPGRADE

to the **Connex Spot Monitor** and receive a **\$250 rebate** per eligible device purchased

AAMI and ISO Certified
